

S.NO	APPLICATION DOMAIN	COMPLEX PROBLEM IDENTIFIED	JUSTIFICATION
1.	HEALTH CARE	*Difficulty in real-time patient monitoring* *It isn't easy for elders or those with low resource settings and they have difficulty in taking medicines.	*To solve real-time patient monitoring we need to use health monitoring devices and sensors that can track vital signs such as heart rate. * Blood pressure. *Voice -activated reminders.
2.	TRANSPORTATION	*High frequency of accidents *Due to heavy traffic in metro cities it takes lots of time to reach the destination.	*AI-powered systems in vehicles can monitor driver behaviour. *AI can monitor traffic signals and advise another path to reach the destination by suggesting another path.
3.	COMBATING ONLINE MISINFORMATION & SCAMS	*Verify the information from multiple trusted sources especially before sharing news or making financial decisions online.	*Launching programs that teach digital literacy to help people identify credible sources and spot any fake news or scams.
